**UM TO PRESENT LECTURES ON GREENHOUSE EFFECT,
GLOBAL CLIMATE CHANGE**

MISSOULA --

The University of Montana forestry school and geology department will present two free public lectures on the impact of the greenhouse effect and global climate change.

Douglas Fox, chief meteorologist for the U.S. Forest Service's Rocky Mountain Research Station in Fort Collins, Colo., will discuss "Impact of Global Change on Forest Ecosystems" on Wednesday, Jan. 31. Fox leads the station's research on atmospheric influences on alpine and subalpine ecosystems and is the program manager for the Forest Service Global Change research program in the Rocky Mountains.

Charles Keeling's topic Thursday, Feb. 1, will be "Should We Worry About the Greenhouse Effect?" Keeling is an oceanography professor at the Scripps Institution of Oceanography at the University of California in San Diego. His major interest is the geochemistry of carbon in the context of the global carbon cycle. He's a fellow in the American Academy of Arts and Sciences and won the 1980 Second Half Century Award of the American Meteorology Society.

Both lectures will be at 7 p.m. in the Urey Lecture Hall, formerly the Underground Lecture Hall.
